# LAMINATED WOODEN FLOORING

## Benefits

- Variety of designs
  - 28 Shades in Stock
  - Customized designs for projects more than 10000 square feet
- Technical Specs
  - Surface structure :- Embossed, Crystal
  - Wax Coated Edges for improved water resistance
  - High Density Fiberboard Panel for better stability
  - Highest grade of Density of the flooring 880 Kg/Cbm
  - Lowest Formaldehyde Emissions – E1 Standard
  - ASTM's fire and flammability standards - B1 Standard
  - Thickness of panel with uniformity at 8 mm
  - Width of the planks 145- 195 mm
  - Class of use 32
  - Abrasion resistance AC4
  - Box Packaging (8-12 Planks in a box)
  - Used case light commercial and heavy residential
  - 5 years commercial warranty
  - 15 years residential warranty

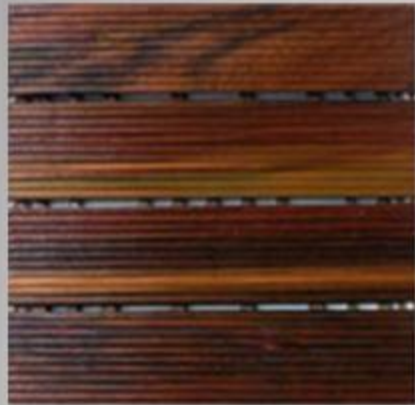

# DECK WOOD

## DECK MOOD

Deck Floor is solid wood floorings primarily used in exterior conditions around the swimming pool area, garden paths, saunas, terraces, Patios etc. The wood is selected from the best of the sources and presented in plank forms or tile forms backed with a tough Polypropylene Grid. The regularly oiled deck floors add a touch of natural aesthetics to the applied area.

- Gazebos
- Health Spas
- Fitness centers
- Seaside lidos

**IPE**

**Teak Wood**

**Pine**

# Faux Alabaster

enhancing material made up from high-quality resin.

## USAGE:-

- Light Permeable Ceiling.
- Different Types of Partition.
- Different types of Furniture.
- Indoor & Outdoor Light Permeable Structure.

## SPECIFICATION:-

- STANDARD SIZE:- 1220 X 2440 X 6MM THICK

## WEIGHT:-

Approximate weight of 6MM thick alabaster is " 10.5 kg/sq.mtr.", the weight would increase by 1.2kg every 2mm.

Solid surface is a non-porous low-maintenance counter top surface. It can mimic the appearance of stone and other naturally occurring materials, and can be joined invisibly by a trained craftsman. Typically manufactured in sheet form for fabrication into finished counter tops, solid surface can also be cast into a variety of shapes, including sinks, shower panels and bathtubs. Color and design flexibility are key factors when choosing Solid Surfaces over natural stone.

In a residential setting, solid surface can be used as kitchen countertops, bathroom vanity tops, and shower and tub surrounds. A major appeal of solid surface is its seamless nature. They have a surface finish which makes them impervious to bacteria, staining and most of the problems inherent in natural stone. Solid surface sinks can be joined to the counter top surface with no gaps, which eliminates areas for water to collect and bacteria to grow. Integral back splashes can also be created that follow the contours of the wall "seamlessly" and without gaps.

## Product Properties

- Environment Friendly & Non Toxic
- Seamless Joint
- Durable Easy to Install
- Heat Resistant
- Stain Resistant

## Applications

- Kitchen Space
- Bathroom Space & Sanitary Ware
- Commercial Space
- Entertainment Space
- Retail Space
- Interior Decoration & Wall Paneling
